

## Analogue Video and Power cable

Combines video and power in one single cable

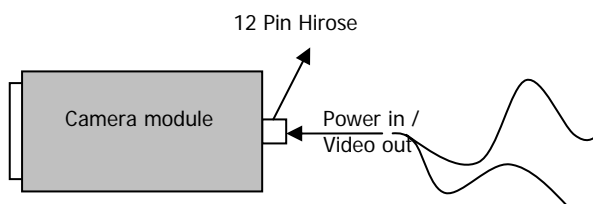

### General specifications:

- High grade construction
- Length up to 40 meters
- 12-pole Hirose connector compatible with analogue cameras, i.e. Sony, JAI, Teli etc.
- Monochrome or Colour composite camera
  - 1 BNC (Video out)
  - 12 VDC (power in) through open end

### Description:

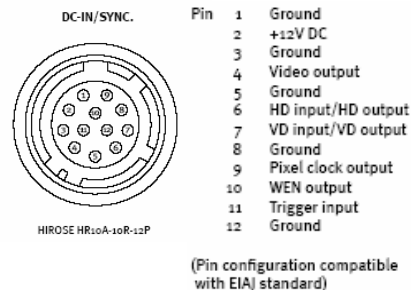

MCAP Cable and Glassfiber Assemblies supplies a high quality data / power cable for easy connection of your analogue camera to a frame grabber or other video capturing device like a monitor.

The use of one cable providing both video output as well as power input gives the user the advantage of minimizing installation time and saving space in the hardware concept.

This cable is available for:

- monochrome (CCIR or EIA compliant)
- colour composite (PAL or NTSC compliant) cameras.

\*) Depending on type of frame grabber different kind of connectors can be used. Like SMB or D-SUB

Every cable can be manufactured to suit your needs. Please contact us to discuss the possibilities.
